

Three members of the Society for Planetary SETI Research, Dr. John Brandenburg, George J Haas and Keith Morgan attended Ancient Alien's AlienCon at the Baltimore Convention Center during November 9-11, 2018. Dr. Brandenburg and Haas were guest speakers. Their presentations included:

Friday - George J. Haas

The Mayan Codex of Mars. 1 hour 11:40 AM - 12:40 PM | Baltimore Convention Center , Gemini Room (309-310)

Join George J. Haas for this presentation on a set of formations observed on Mars that establish a direct correlation with the art and iconography of Mesoamerica cultures. The session will include a Keyhole Structure, a Three-sided Pyramid, a Parrot Geoglyph and over dozen avian and deer geoglyphs, discovered above the Face on Mars. The session will conclude with a little known Mayan "Star-Wars" event that tells of a celestial battle between Mars and the founders of Tikal and Naranjo.

.....

Unified Field Theory and Antigravity Space Propulsion: Theory and Experiment (ASL). 1 hour 1:00 PM - 2:00 PM | Baltimore Convention Center , Mercury Room (307-308)

John E. Brandenburg

"Einstein died without being able to unify the fields of gravity and electromagnetism. Today, John Brandenburg will prove that anti-gravity through electromagnetism is possible, which upholds the basic "flying saucer design" utilizing "The Tesla Vortex."

.....

Saturday

Do "Spacetime Portals" Exist on Earth? 1 hour 11:40 AM - 12:40 PM | Baltimore Convention Center , Mercury Room (307-308)

John E. Brandenburg

"Spacetime may be more flexible and "reconnectable" than we suppose. Based on the GEM Unified Field Theory of the author, a "Poynting Vortex," first invented by Tesla, may provide a way to create "portals to other locations in spacetime." This may explain reports of access to other spacetimes experienced in severe storms or underground caverns. It also may answer the mystery of the "Philadelphia Experiment" which reportedly moved a Navy ship hundreds of miles."

.....

Sunday

Theoretical Plasma Physics For Dummies. 1 hour 10:20 AM - 11:20 AM | Baltimore Convention Center , Pioneer Room (318-323)

John E. Brandenburg

"Dr. John Brandenburg will explain exactly what it is that he studies and what the layman should know about the work being done by plasma physicists."
